

EDUCATION

- **Yonsei University** Seoul, South Korea
Bachelor of Artificial Intelligence; GPA: 3.86/4.50 *Mar. 2024 – Present*

EXPERIENCES

- **YCC(Yonsei Computing Club) rookies Club** *Mar. 2024 - Dec. 2024*
member
 - Participated in algorithm related study group
 - Worked on a project "Sniff Cam"
- **Play-it Club** *Sep. 2024 - Present*
committee
 - Organized club-wide gaming tournaments and community events.
- **AX Coding Camp** Yonsei University
Aug. 2025
 - learned advanced prompt engineering techniques. Utilized the OpenAI API and Gradio to develop functional AI web services and automate prompt performance testing within a collaborative framework
 - Worked on a project "RAG Chat Bot"

PROJECTS

- **RAG Chat Bot:** Engineered a Q&A chatbot leveraging a Retrieval-Augmented Generation (RAG) architecture to query a private knowledge base. Utilized Python, LangChain, and ChromaDB to ensure accurate and contextually relevant responses.
- **Sniff Cam:** Developed a real-time behavioral analysis system leveraging computer vision to detect potential intoxication from CCTV footage. Utilized Python, OpenCV to extract skeletal data and train a machine learning model for gait analysis, enabling automated risk assessment.

INTERESTS

- Machine Learning, Backend, Cloud Computing, Cybersecurity

SKILLS

- **Languages:** Python, C/C++, MATLAB **Hobby:** Playing games, Photography, Cooking
